

THE PIZZA FARM

Kids,

Come plant and take home an actual tomato plant. A perfect classroom activity that reinforces agriculture, nutrition, and basic science.

Agricultural

Get up close to an actual working demonstration farm. See live plants and animals. See where food is grown and grazed right in the heart of the San Fernando Valley.

Educational

Learn about the plants and animals that make up some of the ingredients used in pizza. Two hour field trip experience involves plant and animal sciences on a K - 6 grade level which directly complements the science curriculum.

Interactive

See plants and animals. Hear the sounds on a farm. Touch oils, plants, seeds, mixtures, flowers and maybe bugs. Experience planting your own tomato seeds to take home with you.

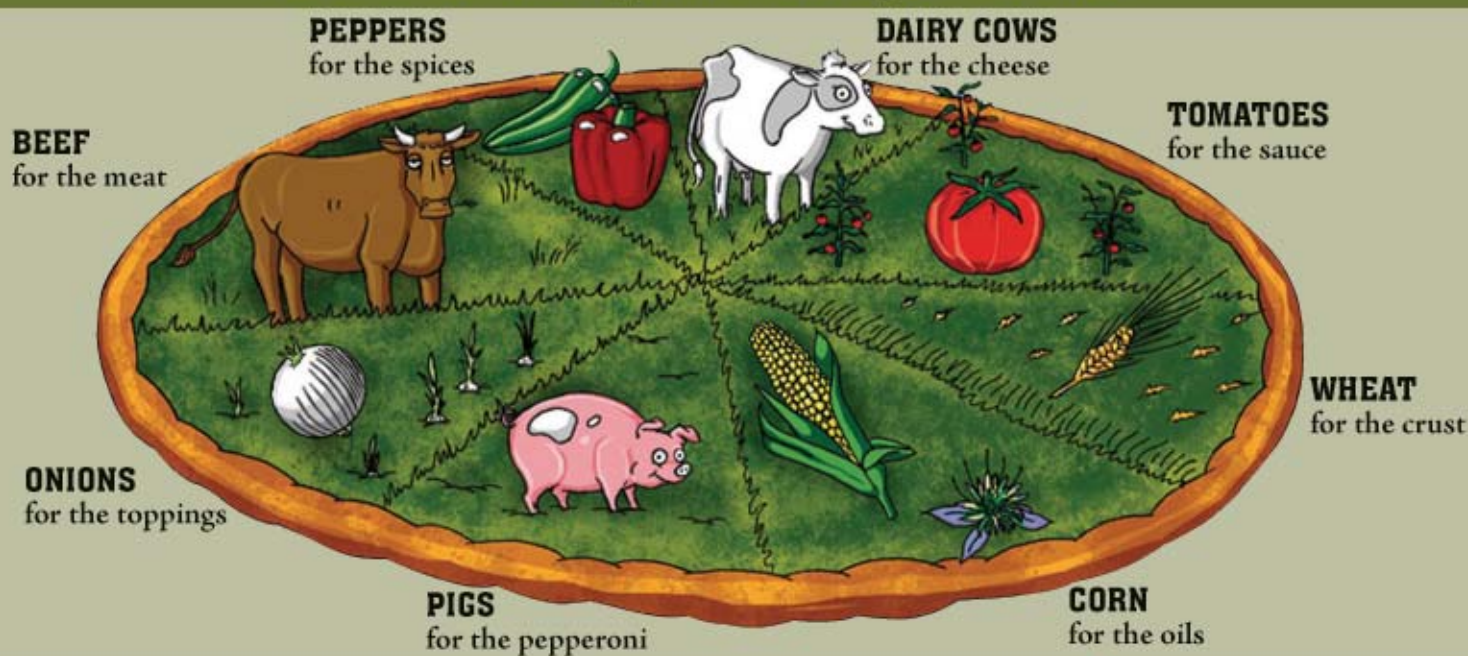

Located at the Pierce College Farm Center • P: (818) 999-6300 • F: (818) 700-9720

WHAT IS A PIZZA FARM?

A Pizza Farm is a living, growing demonstration utilizing both animals and vegetables actually grown or grazing within each slice of a Pizza. This actual 120-foot diameter pie allows children the ability to get up close to the agricultural experience by relating everything to a pizza.

Our program offers a fun, informative experience that combines an interactive program with structured curriculum designed to complement the California State educational standards for K through 6th grades.

Here is an example of what you will see

Once you book your visit, you will receive a teachers activity guide, packed with lesson plan materials that can be used to integrate classroom participation before and after your experience to our farm.

PIERCE COLLEGE

FARM CENTER
